DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28, drawn to a method for quantifying analyte polynucleotide in a sample, classified in class 435, subclass 91.1.
 - II. Claims 29-40, drawn to a method for relating pre-amplification amounts of analyte polynucleotide and post-amplification amounts of analyte amplicon, classified in class 435, subclass 6.
 - III. Claims 41-49, drawn to a method of determining whether a biological sample contains an analyte polynucleotide, classified in class 435, subclass 6.
 - IV. Claim 50, drawn to a method for determining whether an analyte polynucleotide is present in a test sample in an amount greater or less than a pre-determined value, classified in class 435, subclass 6.
 - V. Claims 51-55, drawn to a kit for performing amplification reaction, classified in class 435, subclass 975.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to methods which have different method steps, starting materials and goals.
3. Inventions V and I-IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as

Art Unit: 1637

claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the methods of Groups I-IV can be practiced with an entirely different product, such as TaqMan probes and primers.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa E Strzelecka whose telephone number is (703) 306-5877. The examiner can normally be reached on M-F (8:30-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached at (703) 308-1119. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 305-3014 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
